

inRoads

INSTALLATION INSTRUCTIONS

(If you need any assistance call Support at 800-241-4756)

Read Before Installing the New Version of inRoads

If you already have a previous version of inRoads installed on your computer, you will need to uninstall it before installing the newer version.

To uninstall the previous version of inRoads, you will need to access the "Control Panel". This can be done one of two ways.

- 1) Click on your "Start" button and select "Control Panel" or
- 2) Click on your "Start" button and select "Settings" then select "Control Panel"

From the "Control Panel", select "Add/Remove Programs", then Select inRoads from the list of installed programs and click the "Change/Remove" button.

Next you will see a dialog like the one pictured on the left. Select "Remove" then click "Next". You will be asked to confirm the uninstall. Click "OK". You may be asked to delete any shared files. Click the "Don't display this message again." check box and click "YES". At the end of the uninstall click the "Finish" button. inRoads should be removed from the list of installed programs.

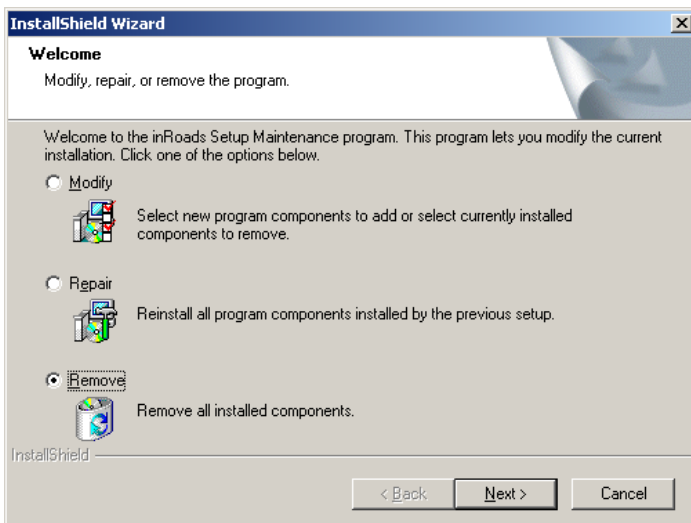

Close any open dialogs and now you're ready to install the newer version of inRoads!
